

## Support & FAQ

Thank you for purchasing this HTML Template! I'd be glad to help you if you have any questions relating to this theme. No guarantees, but I'll do my best to assist. If you have a more general question relating to the themes on ThemeForest, you might consider visiting the forums and asking your question in the "Item Discussion" section.

### ***How to add another section?***

Add this: `<li><a href="#section-name" class="splink"> Section-Name </a></li>` to the "main nav" menu and give all content columns its corresponding class (`<div class="element clearfix col1-3 section-name">`).

### ***How to change the thumb hover?***

In styles.css, look for .sliphoveritemTitle and .sliphoveritemTitle span, where the first stands for the project name and span stands for the category. If you need help on how to change them, just submit a ticket on our support forum: [weibergmedia.ticksy.com](http://weibergmedia.ticksy.com).

### ***How to add another tile?***

Here you can choose between 1/3, 2/3 or 3/3 columns.

Keep in mind that all columns (except the .auto columns, which might be used for example as blog posts or portfolio item descriptions) have a fixed height, so that the packery filter can align the content pixel perfectly.

NOTE: the "home" class is used to display a tile on default (on ALL page).

### ***How to add fancybox lightbox and create groups of images/videos?***

Wrap this around the image(s) or icon(s) where you want to add a larger image opening in lightbox upon mouseclick:

For single Image: `<a href="images/pic-large.jpg" data-title="" class="popup"></a>`

For a group of images: `<a href="images/pic-large.jpg" data-title="Image Title here" data-fancybox-group="group1" class="popup"></a>`

For a video popup: `<a`

href="http://player.vimeo.com/video/48792900?title=0&byline=0&portrait=0&color=ffffff" data-title="" class="video-popup"></a>

You can also add more groups by giving them a different data-fancybox-group name.

If you need the fancybox JS and CSS files, just send me an email.

### ***How to alter the transition animation speed of the filter?***

In jquery.isotope.load.js line 17, you can change the speed, which is displayed in seconds:

The default is: transitionDuration: '0.6s'

### ***How to change the email address to which emails are sent from the contact form?***

Find in contact.php: \$address = 'hello@email.com';

There you can enter your email address. A few lines further down, you can also change the text which is displayed in the email as well as change the error/success messages.

### ***When adding your own logo...***

In styles.css, you need to look for *#logo a* and change the following:

Add your own background image, change the background size as well as the height and width of the link itself. Try to keep it close to the original in size and below 52px height so it fits on the header. For retina displays, you also need to change the logo image double in size in retina-responsive.css on line 8.

### ***Need more (social) icons?***

You find the codes in styles.css. If you need more icons added to the font or more PNG icons, just drop me an email.

***If you need help, just submit a ticket on our support forum: [weibergmedia.ticksy.com](http://weibergmedia.ticksy.com)!***
